

IPIECA

Inland Response

(8 Hours) Accredited by The Nautical Institute

Course Description: This course has been developed from IPIECA guidance paper in responding to Inland Spills. Oil Spills from inland source are far more frequent than spills at sea, and present different challenges to responders. In this course we will look at types of spills, how they can affect the environment and the strategies for dealing with them on the surface, under the surface, in water courses and on rivers.

The course has a good balance of theory and practical and can be taken at our training facilities or at client's premises.

Duration: 8 Hours

Max Number: 14

Who should attend: Response Contactors, Pipeline Operators, Fuel Depot Staff

Course Content:

1. Spill Causes & Prevention
2. Environmental Issues
3. Steps of a response
4. Safety Issues
5. Response on land
6. Response in water courses
7. Practical damming exercise

Validation: 3 years
