

Basic Spill Response – Work Sites/ Industrial

Course Description:

Over the past 10 years windfarms both onshore and offshore have been a predominant feature in our country, supplying a new cleaner form of energy. Oil Spills from these turbines are uncommon, but if they do happen, it's important to have a team that can quickly deal with these small spills to minimize impacts on the environment.

Duration: 4 Hours

Max Number: 18

Who should attend: Maintenance staff, Control room staff, Managers, HSE Managers

Course Content:

1. Spill Causes
